

COPPER MULTI-X

COPPER GREASE

DESCRIPTION

Xenum Copper multi-X is both a lubricant and mounting paste for versatile use. It is designed for applications in very aggressive environments and is water resistant.

BASIC ADVANTAGES

- Resists vibrations and shocks.
- Has good adhesive properties.
- Prevents corrosion and corrosion by chemical agents.

APPLICATION

- Mounting paste for flanges, boilers, crawler chains, pipes, joints, shafts and the like.
- Lubrication of shafts and pins, sliding surfaces in salt or alkaline environment.
- Designated for application on slow acting organs.
- (Certainly not suitable for roller and ball bearings)

CHARACTERISTICS

NLGI class	2
characteristics penetration, worked by 25°C	approx 270
Drip point (°C)	190
Prevent	Slippery
Colour	Grey-coppery
Soap Base	Bentonite
Temperature range (°C)	-40 to + 1100
Viscosity of the base oil C5 at 40°C	93,5
Solids approx..	5%
Molybdenum disulphide	present

PACKAGING

6x100g: ref. 5127100
1x500g: ref. 5097500
