

## PETROL MULTI CONDITIONER

### ADVANCED MULTIFUNCTIONAL PETROL FUEL ADDITIVE

#### DESCRIPTION

Advanced multifunctional petrol fuel additive that improves general performance of the petrol engine and exhaust treatment systems.

#### BASIC BENEFITS

- Increased power and dynamics of the engine.
- Protection against disadvantages caused by use of E10 (10% ethanol) fuel.
- Smoother engine running.
- Improved engine reliability.
- Fuel savings.
- Reduction of CO<sub>2</sub> levels.
- Economical and easy to use.

#### PROPERTIES

- Cleans and lubricates injectors, valves and fuel systems.
- Protects the fuel system from corrosion.
- Protects fuel from oxidation.
- Neutralizes water in the fuel tank.
- Protects fuel systems against corrosion and oxidation.
- Prevents clogging and compromising of the catalytic convertors.

#### APPLICATION

For daily performance and preventive use.

Suitable for all Petrol engines including the latest generation directly injected with exhaust treatment systems.

#### DIRECTIONS FOR USE

Add 25 ml per 25 litres of diesel fuel (1:1000) each time before filling up.

#### TYPICALS

Physical state	Liquid
Colour	Yellow
Melting point	Undetermined
Initial boiling point/range	175 °C
Flash point	68 °C
Ignition temperature	236 °C
Oxidizing properties	Not oxidizing
Vapour pressure at 20 °C	2 hPa
Density at 20 °C	0,82 g/cm <sup>3</sup>
Water solubility at 20 °C	Not miscible

#### PACKAGING

250 ml can with dosing system (12 x 250 ml carton)

1L can (6 x 1L carton)

60L drum

200L drum
